Risk Disclaimer

High-Risk Investments

Trading in foreign exchange (Forex), cryptocurrencies, commodities, and other leveraged financial instruments involves a high level of risk and may not be suitable for all investors.

Leverage may work both in your favor and against you. Before engaging in trading activities, you should carefully consider your investment objectives, level of experience, and risk tolerance.

There is a possibility that you may lose part or all of your initial investment. Accordingly, you should not invest funds that you cannot afford to lose.

If you are uncertain about the risks involved, you are strongly advised to seek independent financial advice.

Market Opinions

Any opinions, news, research, analyses, prices, or other information provided on this website are offered as general market commentary only and do not constitute investment advice.

E-Finance shall not be held liable for any loss or damage, including, without limitation, loss of profits, arising directly or indirectly from reliance on or use of such information.

Internet Trading Risks

There are inherent risks associated with the use of internet-based trading systems, including, but not limited to:

- Hardware or software malfunction;
- Internet connectivity disruptions;
- System interruptions or execution delays;

The Company shall not be responsible for any losses resulting from such technical failures.

Accuracy of Information

The content on this website is subject to change at any time without prior notice and is provided solely for informational purposes to assist users in making independent investment decisions.

While reasonable efforts are made to ensure the accuracy of the information, E-Finance does not guarantee that such information is complete, accurate, or current.

The Company shall not be liable for any loss or damage arising directly or indirectly from:

- The use of the website or its content;
- Inability to access the website;
- Delays or failures in the transmission of data, instructions, or notifications;

Market Risks and Online Trading

The trading platform provides tools for placing and monitoring orders; however, execution at the requested price is not guaranteed.

Although online trading offers convenience, it does not reduce the inherent risks associated with financial markets. All trading activities are subject to the terms and conditions set out in the Client Agreement.

Nothing contained on this website constitutes a solicitation or offer to buy or sell any financial instrument. Such activities may be restricted or prohibited in certain jurisdictions.

Products and services described on this website may not be available to residents of certain countries due to applicable regulatory restrictions.
